+FASTEST GROWING COMPANIES 2006

3 CELERITY IT McLean, Va. 202.3% growth

Celerity IT has had the good fortune of being at the right place at the right time. Recently, the information technology consulting company has doubled – and some years tripled – its revenues. And the company expects to hit the \$45 million in sales by the end of this year. Celerity IT has been able to accomplish this by advising government agencies and commercial clients on the best way to use technology.

"The IT consulting pie in our metro area is a huge market," says Michael Berkman, the company's president and CEO. The company, which was founded in 2002, has 300 employees in Greater Washington, as well as workers in other locations around the country.

Its strategy is to sell services to large companies rather than smaller companies. Celerity IT, which does not name its clients, sells not only to businesses but also to government integrators and a handful of government agencies. The goal is to sell more services directly to agencies, Berkman says.
